

## **Protect Your Products & Equipment with MAGNETIC ASSEMBLY INSPECTIONS**

F&H is your certified inspection resource and provides certification with supporting documentation to reassure the customer & regulatory agencies that your magnetic separation is functioning as intended.

Processing plants often have many custom and standard magnetic trap assemblies in their processing lines. The manufacturers of these traps recommend all magnetic assemblies be inspected periodically to ensure proper operation and uptime to manufacturing lines.

Certified inspections let you know that your magnetic assembly is operating as intended and at 100%. If F&H finds any issues upon inspection, the customer will be notified immediately to minimize downtime and expedite any corrective action.

F&H will inspect for cracked/broken magnets, large loss of gauss, catastrophic damage and other issues that may inhibit magnet performance. Eliminate shipping costs to the inspection facility to greatly reduce line downtime by calling F&H to schedule your on-site inspection. Replacements, if necessary, can be installed at the time of inspection.

### **Not sure what kind of magnetic separator you have?**

No problem, contact us and we will be happy to assist any way we can.

**Call your nearest F&H representative to schedule your inspection!**
